

Engineering Staff College, Bangladesh

is going to offer a Training Course on Fundamentals of GOB Project Management

Training Title: **Fundamentals of GOB Project Management**

Why to learn Project Management?

A project is a unique, transient endeavour, undertaken to achieve planned objectives, which could be defined in terms of outputs, outcomes or benefits.

Project management is the application of processes, methods, knowledge, skills and experience to achieve the project objectives.

It may also be defined as a methodical approach to planning and guiding project processes from start to finish. According to the Project Management Institute, the processes are guided through five stages: initiation, planning, executing, controlling, and closing.

Participants of this training will find an exciting opportunity to refine their thinking and find out what they can do to become even more effective in conducting project management on their job.

Course Contents:

i) Development Planning Process in the GOB (ii) Introduction to Project Management (iii) Project Identification and Developing Business Case (iv) Project Preparation (v) Project Processing, Approval and Revision Procedure (vi) Project Planning (vii) Project Finance and Accounting (viii) Project Implementation (ix) Role of the Key Agencies and Committees throughout the Project Management Cycle (x) Project Closing (xi) Project Monitoring and Control
